Dear Sangita Das,

Thank you for submitting a request to buy a 3D asset.

EON-XR requires some optimization and tuning of models to get the best user experience, so here is what we will be doing for you:

- Optimize:** 3D content is always more demanding than 2D images and to make it possible to view and interact on most devices, we need to optimize the assets as much as possible to allow for a good experience.
- Naming:** EON-XR is built on having correct names on all parts and we use that to auto-generate annotations, quizzes, enable interactions, and a few others functionalities.

For your reference, your request details are as follows:

Name: Skull and Bones

Base Price:

Multi-mesh Asset Requested: Yes

Auto-Approval Conversion Price Limit: 30.00

Once the model is done and optimized, you will get another confirmation that the model is ready to be used in your own EON-XR institution.

Thank you,

The EON Reality Development Team
