THE DEATH OF CODE MONKEYS

How AI Turned “Idea Guys” from Punchlines to Profit Centers

Why your CTO is polishing their LinkedIn profile

YOU CAN'T OUTWORK AN AGENT

But You Can Out-Imagine One

Code used to be a competitive edge.
But AI doesn't sleep—and it never forgets.
The grind is gone. Execution is automated.
Now, the real power lies in clarity, originality, and bold imagination.

THE END OF EXECUTION SUPREMACY

Silicon Valley crowned engineers.

“Idea people” became memes.

Then AI made execution infinite, and vision became scarce.

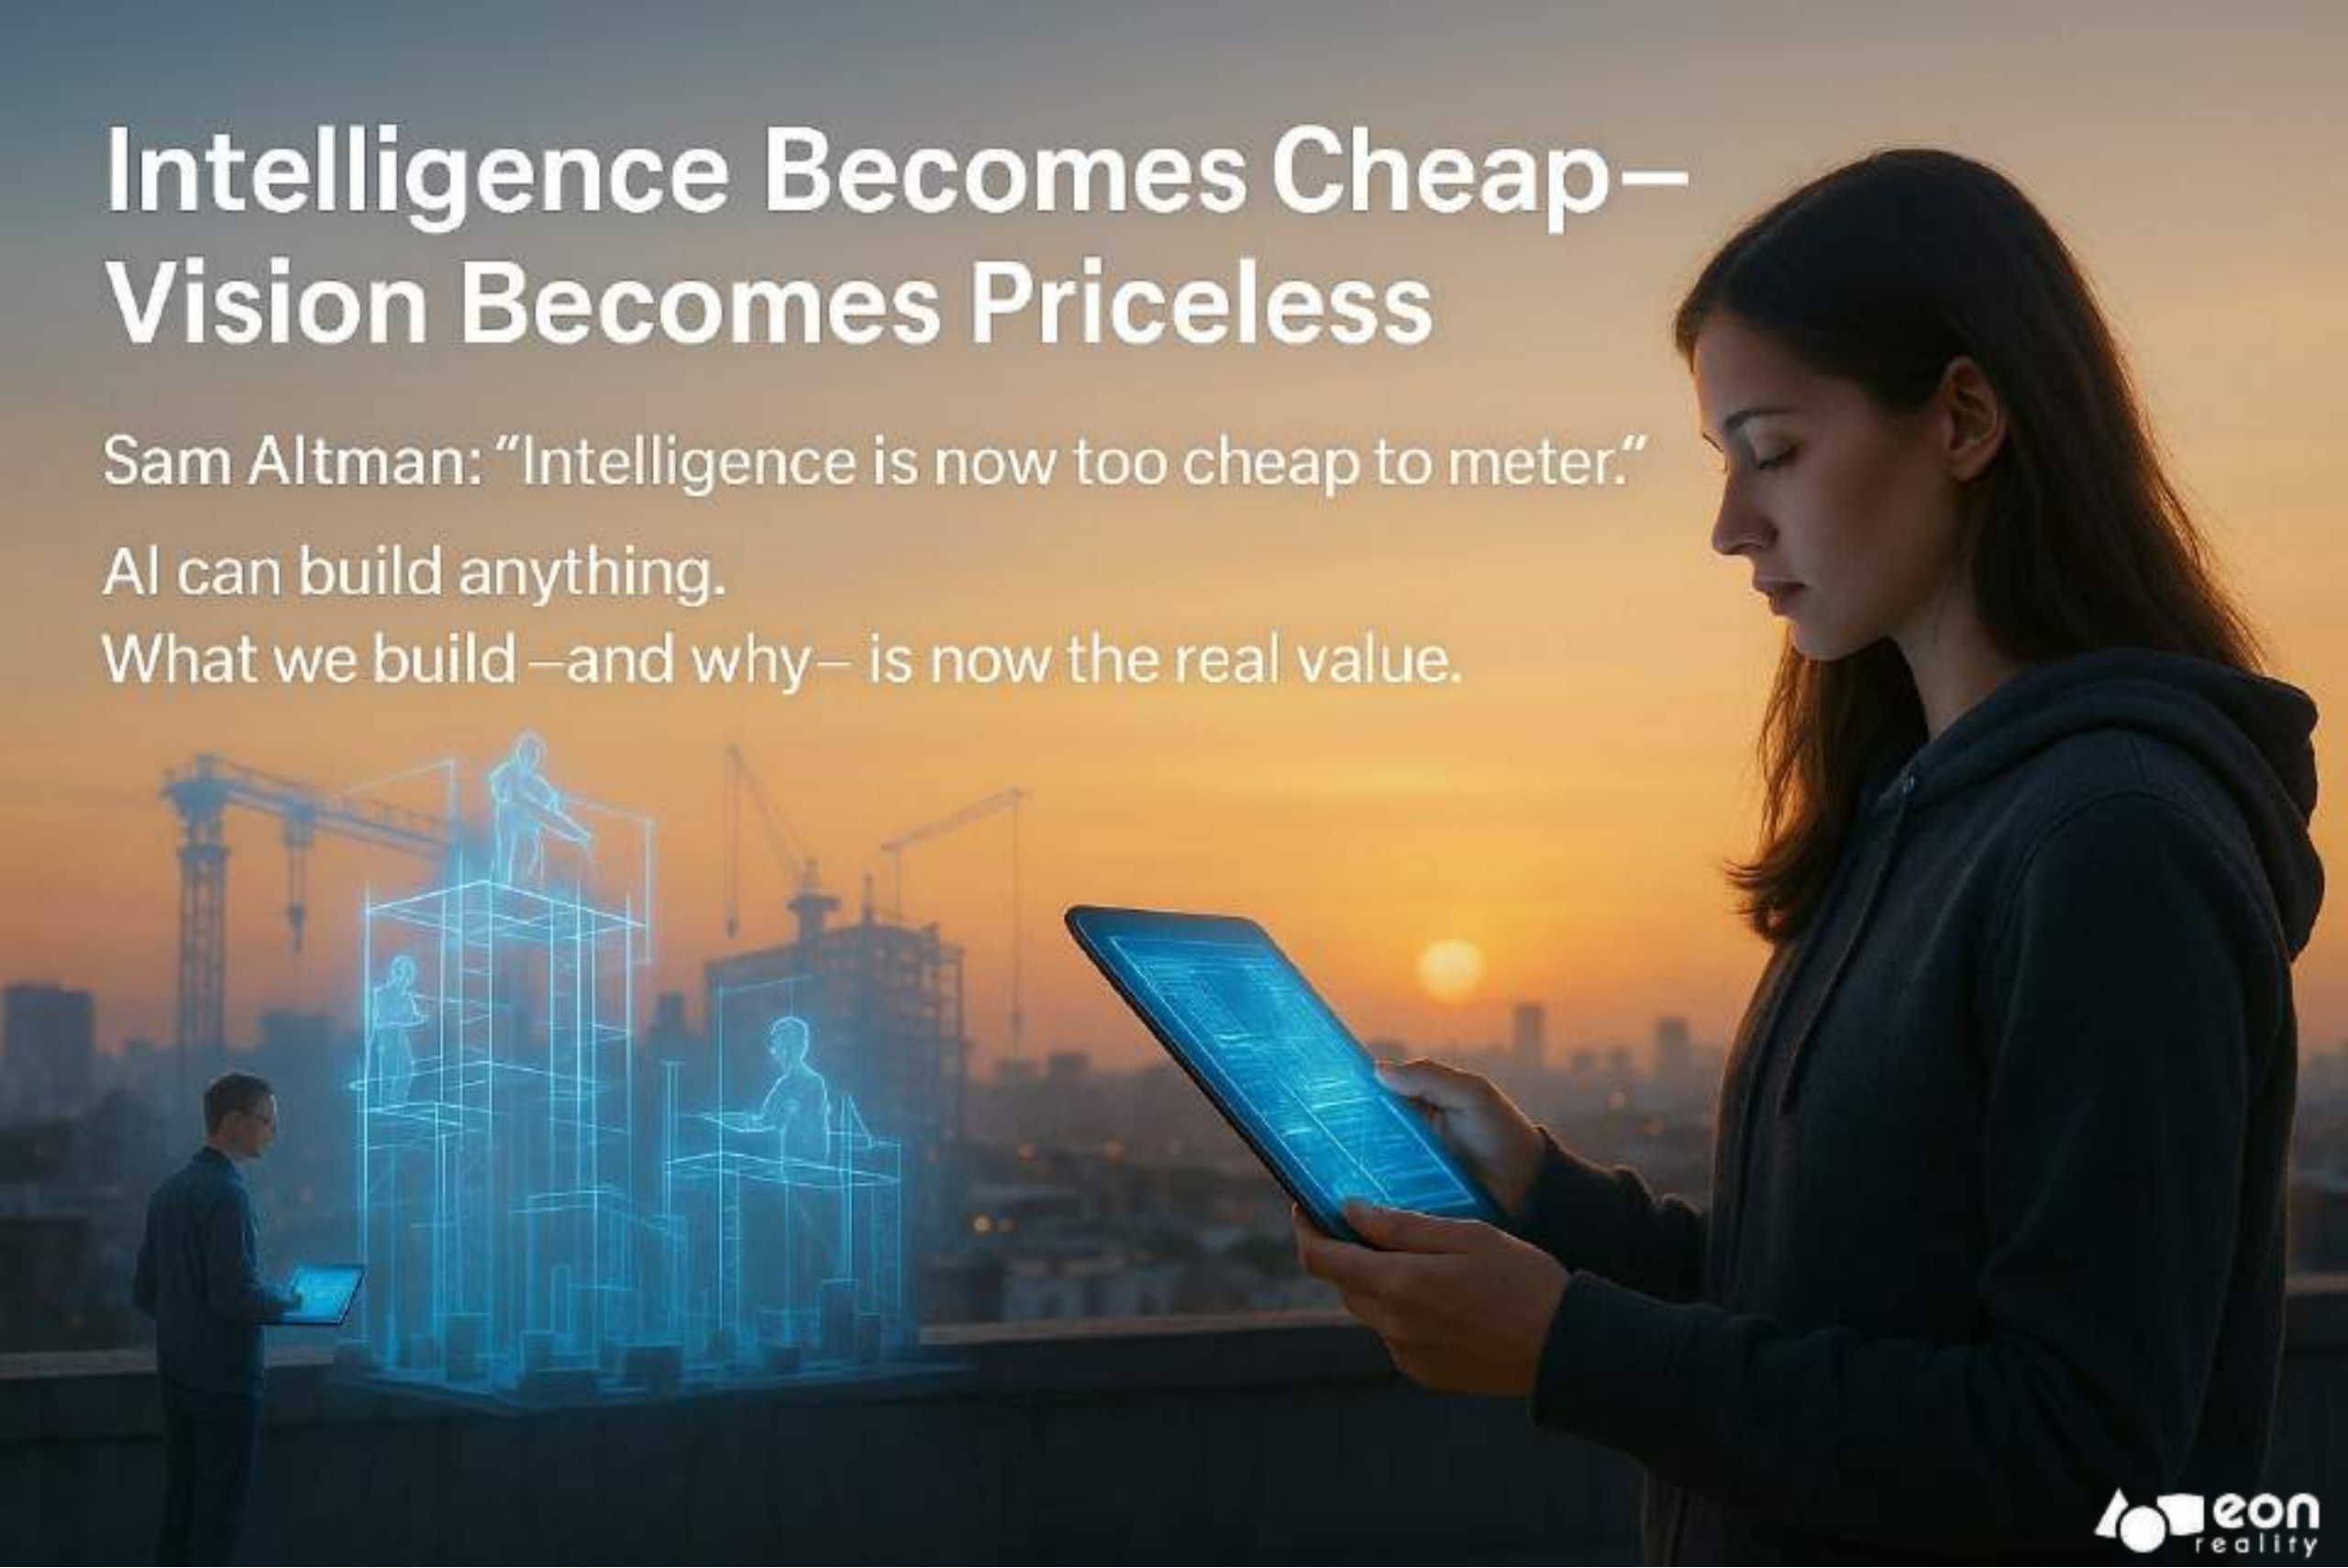

Intelligence Becomes Cheap— Vision Becomes Priceless

Sam Altman: "Intelligence is now too cheap to meter."

AI can build anything.

What we build—and why—is now the real value.

EON's \$500M Accident

- No VC. No code army.
- Just ideas, persistence, and AI augmentation.
- EON survived 25 years while billion-dollar VR startups collapsed.

THE THOUSAND-AGENT COMPANY

Why hire 1,000 engineers when 1,000 AI agents can do it faster?

Execution is now abundant.

Imagination is the new constraint.

THE GREAT VALUE INVERSION

Code is a commodity

Clarity is king

Experience is overrated

The naive now outperform
the seasoned

FROM CODERS TO CONDUCTORS

- The best teams don't build.
- They orchestrate.
- Leadership is vision + AI.
- Idea guys are now idea CEOs.

Hiring Imagination, Not Engineers

- Creative thinkers are now the premium hire
- Visionaries over technicians
- Your next team? 3 humans, 300 agents.

THE EON PLAYBOOK WORKS

- No technical co-founder.
- No venture capital.
- Just real customers and real outcomes.
- \$500M+ in AI-augmented revenue

WELCOME TO THE IDEA ECONOMY

- Everyone can build.
- Few know what to build.
- AI equalizes execution.
- The only premium left is your imagination
