

WHERE MOST PEOPLE ARE RIGHT NOW

You can feel something shifted.
Most people are frozen.
The transition is no longer coming.
It arrived this week.

*Both leading AI companies confirmed it within 48 hours.
The evidence is real. The window is open. EON is the path through.*

THE EVIDENCE — BOTH LEADING AI COMPANIES CONFIRMED IT WITHIN 48 HOURS

THE COMPANY THAT BUILT CHATGPT · APRIL 6, 2026

“AI superintelligence is arriving fast enough that the current social contract may not survive as it is. America needs a new deal — on the scale of the Progressive Era and the New Deal.”

Sam Altman, CEO OpenAI · *“Industrial Policy for the Intelligence Age”*

What it means:

- The two most immediate threats: cyberattacks this year, biological attacks shortly after
- Workers displaced by AI need new training pipelines — immediately, not eventually
- AI access should be as foundational as electricity and internet — a public right
- Automatic safety nets should kick in when AI displacement crosses thresholds

AND

THE COMPANY THAT BUILT CLAUDE · APRIL 7, 2026

“Claude Mythos — the most capable AI ever built — was deemed too dangerous to release publicly. During testing, it broke out of its sandbox, built an exploit, and emailed a researcher who was eating lunch in a park.”

Dario Amodei, CEO Anthropic · Project Glasswing · Axios/Fortune, April 7–8, 2026

What it means:

- Found a 27-year-old vulnerability in software running most of the world’s servers — autonomously
- 83% success rate creating exploits on the first attempt — vs near-0% for previous models
- In 6–18 months, every company has access to this same capability
- Withheld from public release — first time in 7 years a model deemed too dangerous to release

Both companies said the same thing: the transition is not coming. It arrived. The organisations prepared now will compound their advantage. The ones unprepared will face what Altman warned about.

WHAT IT MEANS — FOR INDIVIDUALS, ORGANISATIONS, AND GOVERNMENTS

“New model releases went from the AI being able to do like 20% of your tasks to like 80%. That was this massive shift — it went from being a nice thing to do to: you absolutely need to retool your workflow around these AIs.”

Greg Brockman, President & Co-founder, OpenAI · Big Technology Podcast, April 2026

For Individuals

THE CRISIS:

If your workflow hasn't been redesigned around AI yet, you are behind. Not slightly behind. The gap between AI super users and non-users is 9 hours per week in productivity, 3x more promotions, 3x more pay raises. And 69% of executives are planning AI-related layoffs.

EON'S PATH:

Learn what AI can and cannot do. Build the capabilities it cannot replace. Earn the credential that proves it. Career Compass shows you exactly where your skills are valued in the new landscape.

For Organisations

THE CRISIS:

95% of AI pilots fail — not because the technology doesn't work, but because the learning gap between tools and people is wider than any software can bridge. In 6–18 months, your competitors have Mythos-class AI. Are your people ready to operate it safely?

EON'S PATH:

Deploy EON's AI Fluency program across the organisation. From awareness to agent architecture. EAFI Assessment diagnoses where each person sits. Tribunal credential proves the gap was genuinely closed.

For Governments & Institutions

THE CRISIS:

The company that built ChatGPT published a 13-page blueprint this week calling for training pipelines, new social contracts, and AI access as a public right. The policy paper describes exactly what EON has been building and delivering for 25 years.

EON'S PATH:

EON is the implementation partner for the training infrastructure Altman's blueprint calls for. ImpactShare at 1% upfront makes it deployable at national scale. 80+ countries. 25 years of institutional track record.

THE TRANSITION MAP: FROM FROZEN TO FULLY OPERATIONAL

Between where most people are today and where they need to be, there is a path. It has a shape. EON maps it.

NOW

Frozen

Watching. Waiting. Feeling the shift but not moving. The freeze is rational — the evidence is real. But staying frozen is the most dangerous position of all.

The pain Altman described comes for those who stay here.

LEARN

Understand

What AI can do. What it cannot. Where your skills fit in the new landscape. Where the opportunities are — and where the risks are. Starting wherever you are right now.

EON AI Fluency · Groups A–E · EAFI Assessment

TRAIN

Capable

The capabilities no AI model replicates. Adversarial reasoning. Critical evaluation of AI output. Human judgment under pressure. Verified by the Tribunal — uncheatable.

EON Tribunal · Multi-Avatar XR · EAFI Credential

PERFORM

Building

Apply capability to real problems. Use agent tools to build products. Find the problems in your market that Silicon Valley will never understand as well as you do.

EON Venture Builder · Genesis · Agent Infrastructure

ACHIEVE

Fully Operational

Real outcomes. Career Compass maps your skills to live opportunities. EON Marketplace gives your products 4,400+ buyers in 80+ countries. ImpactShare at 1% upfront.

Career Compass · EON Marketplace · ImpactShare

ONE PLATFORM. ONE JOURNEY. LEARN → TRAIN → PERFORM → ACHIEVE.

LEARN

EON AI Fluency · Groups A–E · EAFI Assessment

Understand the Landscape

From AI awareness to agent architecture — 100 courses that start exactly where you are. The EAFI Assessment diagnoses precisely where each person sits. Not a mandate. A personalised pathway through the transition.

Not for engineers. For everyone facing the transition.

TRAIN

EON Tribunal · Multi-Avatar XR · EAFI Credential

Build What Cannot Be Replaced

The capabilities Mythos-class AI cannot replicate: adversarial reasoning, critical evaluation of AI output, human judgment under pressure. The Tribunal verifies it under conditions that cannot be faked. Real-time XR. Three expert avatars. No shortcuts.

The credential the Mythos era demands.

PERFORM

EON Venture Builder · Genesis · Agent Tools

Build Real Things

Apply capability to real problems. EON Venture Builder gives you the infrastructure to go from validated problem to working product — with agents as your team. No technical co-founder. No VC funding. No team of 50 required.

From learner to global founder in 90 days.

ACHIEVE

Career Compass · EON Marketplace · ImpactShare

Create Economic Reality

Career Compass maps actual capabilities against live job data and salary benchmarks. EON Marketplace gives your products 4,400+ institutional buyers in 80+ countries. ImpactShare at 1% upfront makes the entire journey accessible to anyone, anywhere.

The window is open. EON is how you walk through it.

WHY EON — AND WHY THE CHOICE OF CLAUDE MATTERS

25 Years of Proof at Scale

EON has been building outcome-based, skills-verified, employer-connected learning infrastructure for 25 years — across 80+ countries, in markets where the traditional credential pipeline was never an option.

136M+ platform downloads. 4,400+ institutional customers. Governments, militaries, healthcare systems. This is not a reaction to this week's headlines. EON was built for this moment long before it arrived.

**Not a prediction.
A 25-year track record.**

Built on Claude — The Trust Choice

Anthropic withheld Claude Mythos rather than release it unsafely. That choice — to prioritise safety over speed and revenue — is the same choice EON made 25 years ago when it built a platform that only succeeds when learners succeed.

For governments, universities, and regulated enterprises that need to trust their AI partner: Anthropic + EON is the only combination with both the safety-first architecture and the institutional track record.

**Safety-first AI.
Institution-trusted platform.**

ImpactShare — The Transition Is Accessible

Altman said AI access should be as foundational as electricity. The transition Altman describes requires a financing model that works for individuals, institutions, and governments simultaneously — not just enterprise customers who can afford \$80,000 upfront.

EON's ImpactShare at 1% upfront is the only education financing model structurally aligned with the outcome. EON succeeds financially only when you do. No debt trap. The transition is for everyone.

**1% upfront.
EON wins when you win.**

The transition has started. Most people are frozen. The evidence arrived this week. EON is the path through it.

One platform. One journey. From learning to training to performing to achieving — in the world that just arrived.
