

# Universities don't need to be replaced. They need to be refilled.

UNIVERSITY-FIRST. STUDENT-SAFE.

We work with your university first. If your university will not move fast enough, we have a \$975 backup plan that gets students there in 90 days.

Dan Lejerskar · Founder & Chairman, EON AI Ventures · Laguna Beach, California

Source: Jay Caspian Kang, "Will A.I. Make College Obsolete?" Fault Lines column, The New Yorker, May 2026. Pew Research Center as cited in source slide.

# College isn't worth what it used to be.

The numbers say so out loud.

A New Yorker writer pulled the data a few weeks ago. Famous schools may survive. Many middle-tier institutions do not have that cushion.

**74% → 35%**

## TRUST COLLAPSE

Young adults saying college is very important

**1 in 4**

## WASTED MY MONEY

Current students who say college is not worth it

**40%**

## WRONG JOB

Graduates working roles that do not need their degree

**70%**

## WRONG DIRECTION

Americans saying higher education is headed the wrong way

Five numbers describe what is broken. The sixth is our answer: we work with universities first.

# Two ways to get there.

We would rather work with your university. We will not leave students stuck if it does not move.

## PATH A · WHAT WE'D RATHER DO

### Through your university.

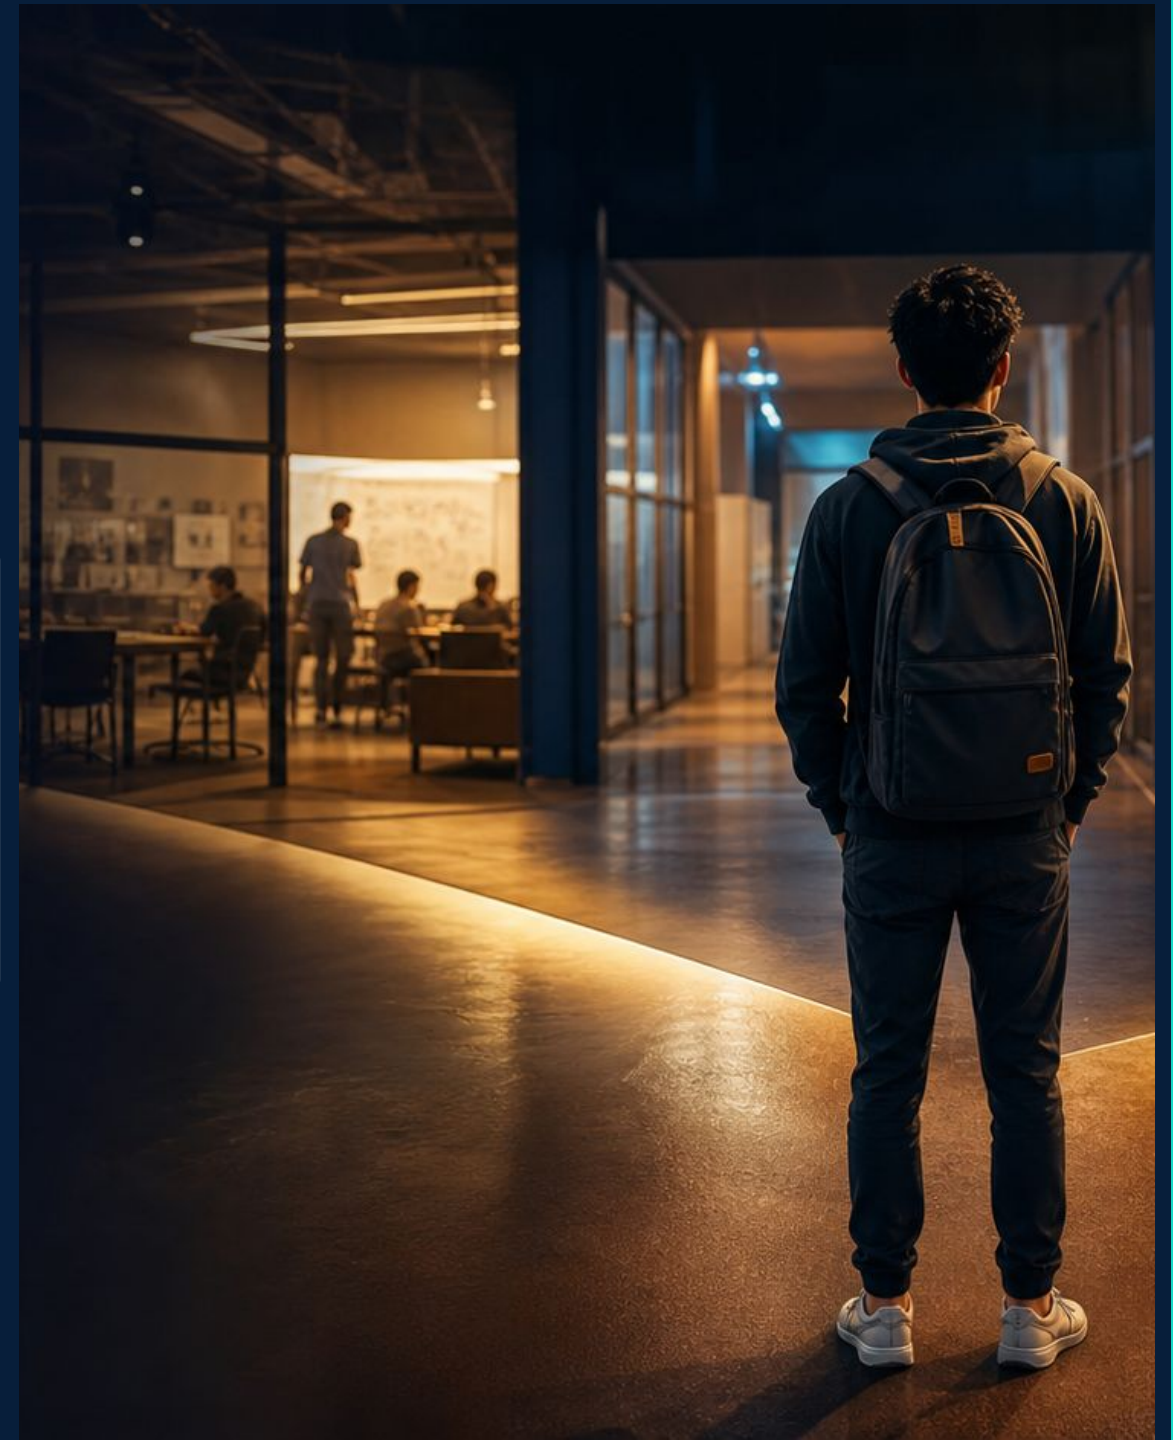

- 90-day AI program inside the existing degree
- School diploma plus EAFI credential
- 9,000-course library plus AI mentor
- Keeps enrollment, revenue, and brand with the institution

## PATH B · IF YOUR SCHOOL WON'T MOVE

### Direct to you.

- Direct path if the school will not teach AI properly
- ohwow.ai/founder with same-week start
- \$975 once, or \$99 per month for a year
- Students finish with a working product plus EAFI credential

Path A is the preference. Path B exists because students cannot put their lives on hold.

### III. WHAT THE PARTNERSHIP LOOKS LIKE

# What we hand a university when they say yes.

No vague solution suite language. Here is the day-one package.

#### 01 THE PROGRAM

A 90-day AI course inside capstone, certificate, or executive ed.

#### 02 THE CREDENTIAL

EAFI sits alongside the diploma and is earned by building something real.

#### 03 THE LIBRARY

9,000 specialized courses across healthcare, energy, manufacturing, finance, and more.

#### 04 THE LAB

Genesis 3 XR simulation for hands-on training before touching real equipment.

#### 05 THE MENTOR

Brainy 2.0 gives every student affordable 24/7 AI tutoring support.

#### 06 THE PORTFOLIO

EON Marketplace access lets students graduate with working products, not only grades.

Your name on the program · EAFI alongside your diploma · We are the engine underneath

**Work with the school first.  
Help the student directly if it can't.  
Either way, they finish with something real.**

"Trust in college has collapsed and it is not coming back. Universities are not the problem. The courses inside the universities have not kept up with what AI can do, and that is fixable. We sit underneath the school brand, add the AI part, and students graduate with the school diploma, our EAFI credential, and a real product they built."
