Not robots. Superhumans.

We are not building robots.
We are launching superhumans.

Field IQ: an expert in every worker's phone

Work accidents kill about 900 people a day.

A certificate does not mean a person can do the job. **Help has to be there on the job, at each step.**

~900
people a day
die in work accidents (ILO)

Paper
is not skill
a test is not the job

Source: ILO. About 900 deaths a day from work accidents. Work injury and illness cost about $3 trillion a year.

Your phone.
Now an expert.

The phone you already carry.

THE BIG IDEA

More than 4.6 billion people already use one (GSMA, 2026). Point it at a real machine. Field IQ names the parts, walks you through your own procedure, and tells you when each step looks done.

IT GUIDES, IT HELPS, IT CHECKS

No headset. No robot. A worker with an expert at their side.

Human 2.0: we are not building robots, we are launching superhumans.

EON AI VENTURES · FIELD IQ SUPERHUMAN

TEN THINGS IT DOES · 1 TO 5

It sees the machine and knows the job

Point the phone at a machine and hold still. All ten things are working on the phone today.

1

No tapping

Hold the phone still. It takes the picture by itself.

2

Names in seconds

Part names pop up on the real machine, one by one.

3

Keeps looking

Walk to another side. It looks again and adds new parts.

4

Reads your PDF

Pick a procedure. It follows every step in your words.

5

Points at the part

A hand and a ring land on it. Or it says where to point.

WHY IT MATTERS

No app training and no headset. The worker points a phone, and the job's own procedure shows up on the real machine, step by step.

Next: it watches you work, warns you about danger, talks with you and learns from every crew.

TEN THINGS IT DOES · 6 TO 10

Five more things it does on the job

While you work, these five keep you safe and keep your hands free.

6
Watches you work

While you do a step, it looks and tells you “not done yet” or “looks done”.

7
Warns of danger

A cable across the floor or a spill? It shows “Look out” and says it out loud.

8
You can talk to it

Tap Ask and say your question. It answers out loud and listens for the next one.

9
Finds faults

Tap “What’s wrong?” and say the problem. It asks to see one thing at a time.

10
Learns from crews

When several crews get stuck on one step, the next crew is warned first.

WHY IT MATTERS

About 900 people die in work accidents every day (ILO). Field IQ guides you, assists you and verifies the work, so people do not do the wrong thing.

We are not building robots. We are launching superhumans.

SEE IT IN ACTION

A real telescope, 12 steps, done in 2 min 25 s

WHAT YOU SEE — Field IQ names all 8 parts in seconds. A blue ghost hand and a ring land on each part, and it sees your hands: “Hand seen”.

THE FINISH — “Found the front lens cap”, then Job done: 12 of 12 steps, the time taken and the parts it found.

A real phone on a real telescope, guided by a 12-step procedure in the document’s own words

EVERY STEP RECORDED

Assess IQ Report

It does the job with you. Then it writes the report.

When you finish, Field IQ writes the Assess IQ Report by itself, compared with your procedure, step by step.

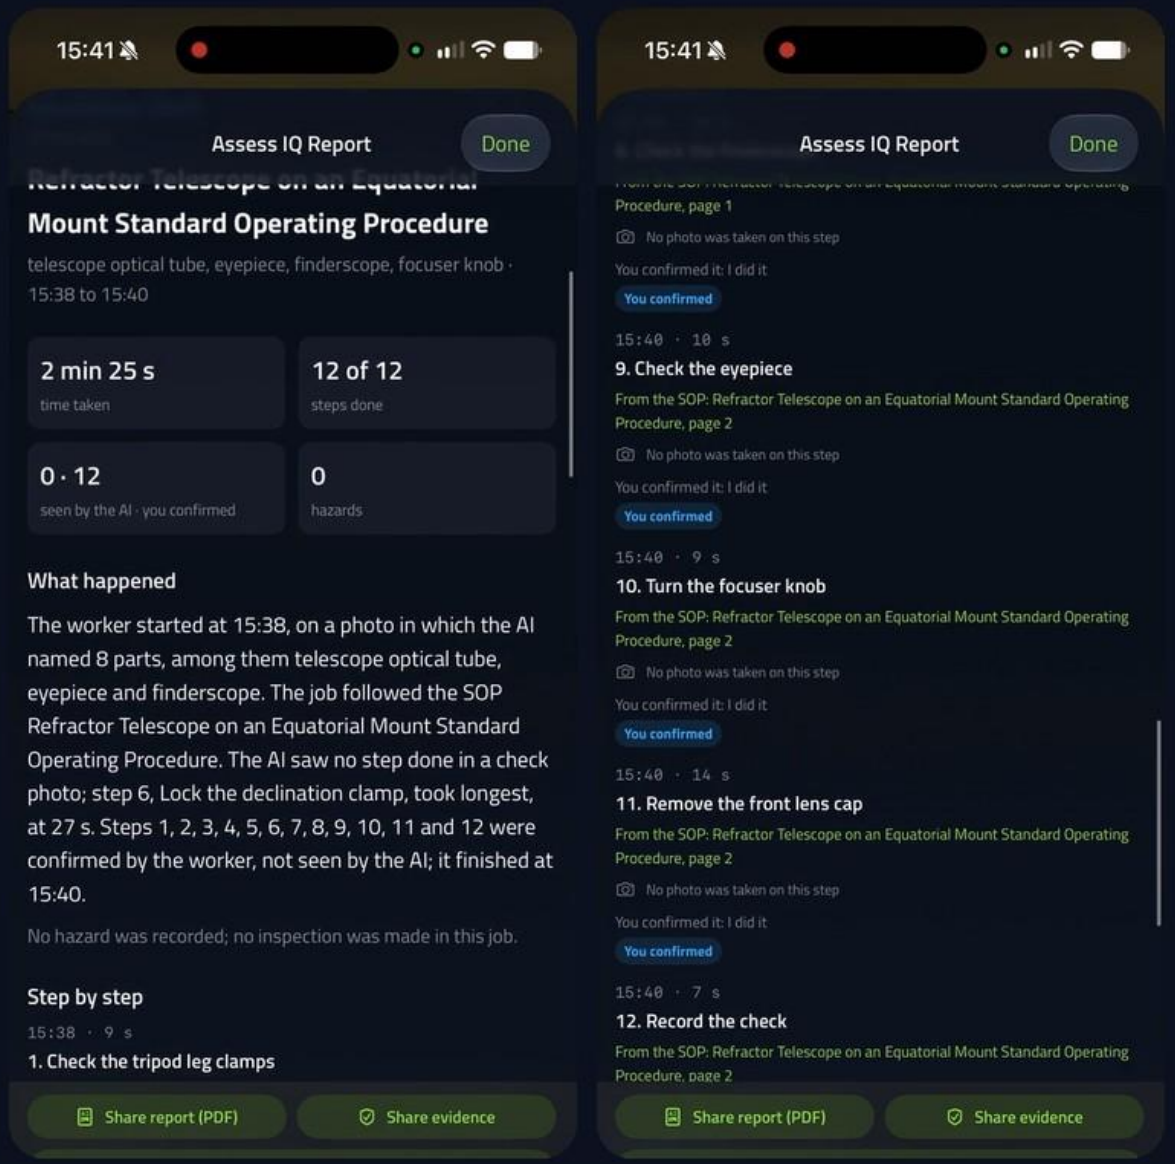

WHAT YOU GET

A Job done screen: the time taken, 12 of 12 steps, and the parts it found.

A signed evidence pack with a SHA-256 fingerprint, so the record can be checked later.

THE TECHNOLOGY

Point the phone. Nine stages follow.

From the first look to a signed record, on the phone you already carry.

1	**Capture** Point and hold still		**It takes the picture by itself** No tapping. It waits until you hold still.
2	**Recognise** Parts named on the machine		**8 parts tagged in seconds** Names pop up on the real machine, one by one.
3	**Keep looking** Walk to another side		**Adds the new parts it sees** Hold still again and it looks again by itself.
4	**Read your SOP** Your own PDF		**12 steps in your own words** It finds the procedures inside; you pick one.
5	**Point at the part** Ghost hand and ring		**Lands on the exact part** Clamp, finderscope, lens cap, or where to point.
6	**Watch the work** “Hand seen”		**“Not done yet” or “looks done”** It checks each step while you do it.
7	**Warn of danger** “Look out”, out loud		**A cable on the floor, a spill** It shows the warning and says it.
8	**Assess IQ Report** Written by itself		**Compared with the procedure** Job done: time, 12 of 12 steps, parts found.
9	**Evidence and learning** Signed, SHA-256		**A record that can be checked** Crews stuck on a step warn the next crew.

GENESIS + FIELD IQ

Practise it in Genesis. Do it in your room with Field IQ.

A Genesis simulation now opens on the phone in two ways. Live on the Genesis beta site; the production rollout is in progress.

AR mode

The Genesis lesson in your room: steps, moves, highlights, checklists

Field IQ mode

The bare 3D model. Field IQ names the parts, then runs the steps

The link

The Field IQ link and QR code end with ?mode=fieldiq

STATUS

Live on beta. Production rollout in progress.

Same procedure, same guidance: from the simulator to the real machine.

SETTINGS AND DEPLOYMENT

One app. The phone you already carry.

Field IQ runs on iPhone and Android phones. No headset and no new hardware.

SETTINGS

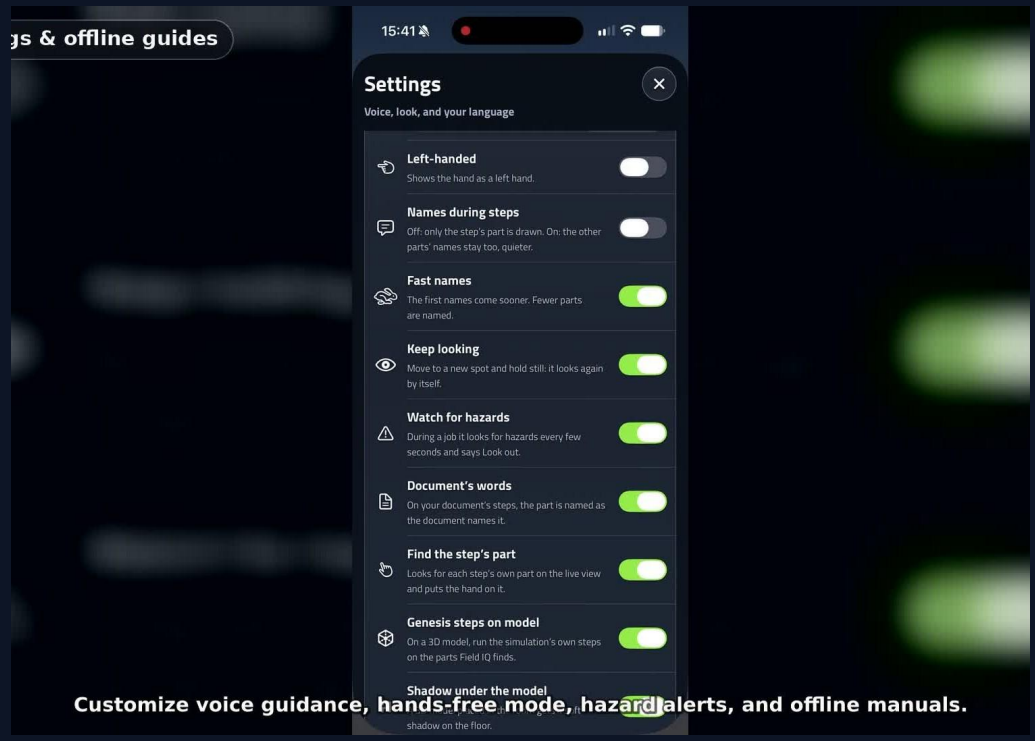

Voice, look and your language: left-handed mode, fast names, keep looking, watch for hazards, your document's words, Genesis steps on a model.

INSTALL

App Store and Google Play, plus the web at **fieldiq.eonreality.com.**

ACCOUNT

A company Field IQ account unlocks full use for the crew.

Customize voice guidance, hands-free mode, hazard alerts, and offline manuals.

Each setting is one switch on the phone.
Turn on only what the job needs.

THE OFFER

Lighthouse partners start at no cost.

$50,000

instead of $250,000. That is what first-round customers pay, after the Lighthouse simulator.

Lighthouse partners
Their first simulator is built at no cost.

Guides

A hand and a ring land on the exact part for each step.

Assists

Answers out loud while your hands stay on the job.

Verifies

Tells you "looks done" and records the evidence.

Field IQ guides the next step.
Frame from the video

Offer: EON Lighthouse programme. Pictures: frames from the Field IQ launch video.

Get it today

We don't build robots.
We unleash superhumans.

Field IQ is available now on iPhone, Android and the web. Point your phone at the machine: it guides you, assists you and checks every step.
